GROUPING SETS

Grupowanie zgrupowanie danych w podgrupach :D

```
   SELECT ...
     FROM ...
GROUP BY GROUPING SETS (...),
         CUBE(...),
         ROLLUP(...)
```

https://www.postgresql.org/docs/12/queries-table-expressions.html#QUERIES-GROUPING-SETS

ROLLUP = GROUPING SETS, ale ...

```
GROUP BY ROLLUP (e1, e2, e3, e4)

GROUP BY GROUPING SETS ( (e1, e2, e3, e4),
                         (e1, e2, e3),
                         (e1, e2)
                         (e1)
                         ()
                       )
```

https://www.postgresql.org/docs/12/queries-table-expressions.html#QUERIES-GROUPING-SETS

CUBE = GROUPING SETS, ale ...

```
GROUP BY CUBE (e1, e2, e3)

GROUP BY GROUPING SETS ( (e1, e2, e3),
                         (e1, e2    ),
                         (e1,     e3),
                         (    e2, e3),
                         (e1        ),
                         (    e2    ),
                         (         e3)
                         (          )
                       )
